Introduction

Saskatchewan's flora and fauna have been the subject of biological and management investigations over the years. Findings have been presented in technical reports, bulletins, scientific papers, and theses and project reports.

Fisheries studies have focused primarily on fish populations, fish species, limnology, and management. Aquatic flora includes algae and rooted and non-rooted larger vegetation found in water. Aquatic fauna includes zooplankton, crustaceans, molluscs, insects and other invertebrate groups. Limnology is the study of inland waters, including water chemistry, morphometry, and oxygen and other conditions.

Wildlife reports encompass many aspects of research and management of wildlife and habitats. Most of the reports focus on management of harvested birds and mammal species, as well as recovery plans for rare and endangered species. A great deal of focus has also been placed on habitat inventories and habitat management.

This report provides a bibliography on wildlife topics and updates an earlier bibliography on fisheries topics. The format of this bibliographic listing is author, year, report title, report series and number, publishers, and subject. It includes all department reports relating to fish, fisheries, wildlife (upland and game birds, waterfowl, and big game), hunting, and fish and wildlife habitat. Literature cited includes references dating from 1949 to 1999.

The main criterion for listing is that a publication pertains to flora or fauna or habitat areas found in Saskatchewan or overlapping provincial borders. The list comprises primarily of reports and information bulletins published by Fisheries Branch, Wildlife Branch, or Fish and Wildlife Branch in various report series. We did not include university theses (e.g. Master or Ph.D.), journal or periodical articles, or environmental impact reports since these are cited in other places. The same work is cited here if it was also published as a departmental report or bulletin. We did not include project reports from educational institutes or newspaper items.

The printed bibliography has its references arranged alphabetically by author and year, and includes keywords or subjects at the end of each reference listed. We intend to make this bibliography available as a searchable document and to update the contents every few years.

The author would appreciate having any omissions brought to her attention so that such references can be included in subsequent updates.

We hope that this bibliography will be useful to aquatic and wildlife biologists and ecologists interested in Saskatchewan.

Abbreviations

DNR	Department of Natural Resources
SERM	Saskatchewan Environment and Resource Management
SNR	Saskatchewan Natural Resources
SPRC	Saskatchewan Parks, Recreation and Culture
SPRR	Saskatchewan Parks and Renewable Resources
STRR	Saskatchewan Tourism and Renewable Resources

Acknowledgments

I would like to express my thanks to Rob Wallace, Al Arsenault, Dave Brewster, Jennifer Merkowsky and Ed Beveridge for their editorial comments. They were very helpful and greatly appreciated.
